

# Insufoam<sup>4000</sup><sup>®</sup>

The best solution for thermal insulation in floors. Insufoam 4000<sup>®</sup> is a thermal insulation material with the best performance for thermal insulation of floors. With its compressive strength, zero moisture absorption, and load capacity, it offers the best cost-benefit results and longest system life.

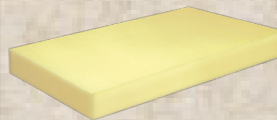

High value of thermal resistance.

Availability in different thicknesses and lengths.

Zero water absorption.

Immediate availability in standard measurements.

No maintenance needed.

Long term thermal stability.

Optimizes the energy consumption of the air conditioning and heater.

Helps control heat transfer, conduction, convection, and radiation.
